

### ABOUT SANTA CRUZ COUNTY BANK

Founded by a group of local business people who share a common commitment to the Santa Cruz area, Santa Cruz County Bank opened its doors on February 3, 2004. Santa Cruz County Bank is a locally owned and operated community bank, serving the needs of the residents and businesses of Santa Cruz County. We believe strongly in the importance of local decision making and responsive customer service. We offer a complete line of depository products and lending solutions for businesses and individuals, including business term loans and lines of credit, commercial real estate financing, agricultural loans, SBA and USDA government guaranteed loans, credit cards, merchant services, mobile banking. remote deposit capture, and online services, including bill payment and cash management. Santa Cruz County Bank operates five full service banking offices located in Aptos, Capitola, Santa Cruz, Scotts

Valley, and Watsonville, and two free standing ATM and Night

### BANK FOUNDERS

Depositories in Santa Cruz and Aptos.

A group of local business people joined to create a local, community bank focused on serving the residents and businesses of Santa Cruz County when it became apparent that the last of the local independent banks was soon to be taken over by a large out-of-area bank holding company. This group that we recognize as Founders all contributed time, money, and talent, not only to the Bank's organizing effort, but continue to be involved and support our Bank as customers, referring family, friends and business contacts to us, and serving as ambassadors of the Bank in our community.

### COUNTY BANK TATEMENT

We are committed to our community
by building lasting relationships and
being a trusted partner that together
empowers growth and economic
vitality.

### SANTA CRUZ COUNTY BANK LETTER TO SHAREHOLDERS

To Our Shareholders,

On behalf of the Board of Directors and Bank Management, we are pleased to present our Annual Report and financial highlights for 2016.

It was an outstanding year for the Bank. Guided by our commitment to build shareholder value, we achieved double-digit percentage increases in assets, loans, deposits and net income in 2016 compared to the prior year. Net income was \$6.5 million which represents a 19% increase over 2015, adding \$2.98 in earnings per share to the book value before dividends. Total assets at yearend were \$588 million, a 15% increase, total deposits were \$529 million, a 15% increase, and gross loans were \$415 million, a 16% increase over year end 2015. These totals resulted in a return on average assets of 1.17% and return on average equity of 13.58% for 2016.

The Bank's loan production in 2016 remained robust, driven by our reputation in the marketplace as a known lending leader. The result was a net increase of \$57 million in gross loans outstanding as compared to 2015. This strong growth in loan production was achieved while maintaining outstanding asset quality, for which the Bank has been recognized on a statewide level. For overall performance in 2016, Financial Management Consulting (FMC) ranked Santa Cruz County Bank as #1 (lowest) in non-performing assets in California.

We continue to set the pace for overall volume of SBA loan approvals through government guaranteed programs. This has consistently placed us in the top tier of local, regional and statewide lender rankings. The Bank is the top SBA lender in Santa Cruz County, 6<sup>th</sup> in Silicon Valley, and 35<sup>th</sup> in California for SBA loan production. Additionally, we are a top USDA lender in the state of California.

On a national level, Santa Cruz County Bank was named in American Banker's *Top Performing 200 Community Banks and Thrifts in the United States* based upon 3-year average return on equity. The Bank placed 44<sup>th</sup> out of the 684 institutions in the nation that met the ranking

criteria. In addition, Santa Cruz County Bank ranked 1<sup>st</sup> for the first three quarters in 2016 and 2<sup>nd</sup> in overall performance for the full year among 185 California banks by Financial Management Consulting Group.

We are pleased to report Santa Cruz County Bank continues to be an outstanding community leader and partner to non-profit organizations in our community. In 2016, we received the United Way Corporate Spirit Award. In early 2017, we received the Big Step award for significantly increasing the number of meals through the Second Harvest Food Bank's Holiday Food Drive. We provided a total of 23,522 meals for individuals and families in our community. The community has recognized us by casting the highest number of votes for *Best Bank* in the Good Times readers' poll, the Sentinel Readers' Choice poll and the Santa Cruz Waves magazine poll. We attribute these recognitions to our employees, who provide exceptional service to customers and engage actively and tirelessly throughout the year in the Bank's campaigns to support and serve non-profit organizations in our community.

We thank you for your investment in Santa Cruz County Bank, your continued support, and your banking referrals, all of which contribute to the success of your Bank. We look forward to serving you in the year ahead.

George Gallucci Chairman of the Board David Heald President & Chief Executive Officer

#### INDEPENDENT AUDITOR'S REPORT

The Shareholders and Board of Directors Santa Cruz County Bank Santa Cruz, California

#### **Report on the Financial Statements**

We have audited the accompanying financial statements of Santa Cruz County Bank (the "Bank"), which comprise the balance sheets as of December 31, 2016 and 2015, and the related statements of income, comprehensive income, changes in shareholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### **Opinion**

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Santa Cruz County Bank as of December 31, 2016 and 2015, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

#### **NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

<u>Nature of Operations:</u> Santa Cruz County Bank, referred to as "the Bank", is a California state chartered bank which offers a full range of commercial and personal banking services to residents and businesses in Santa Cruz County, California, through its five full service offices located in Aptos, Capitola, Santa Cruz, Scotts Valley, and Watsonville. The Bank was incorporated on September 10, 2003 as Santa Cruz County Bank (In Organization) and commenced banking operations on February 3, 2004 (Inception), upon receipt of final regulatory approval. The Bank is subject to regulations and undergoes periodic examinations by the California Department of Business Oversight ("CDBO") and the Federal Deposit Insurance Corporation ("FDIC"). The Bank's deposits are insured by the FDIC up to applicable limits.

The majority of the Bank's business is conducted with customers located in Santa Cruz County and adjacent counties. Its primary deposit products are checking, savings, and term certificate accounts, and its primary lending products are commercial, multi-family, agriculture, loans supported by single-family residential real estate, municipal loans, government guaranteed loans, and installment loans. Portions of said loans are secured by specific items of collateral including business assets, consumer assets, and commercial and residential real estate. Bank products are also supported by various government guarantee programs. Commercial loans are expected to be repaid from cash flow from operations of businesses. There are no significant concentrations of loans to any one industry or customer. However, the customers' ability to repay their loans is dependent on the real estate and general economic conditions in the area.

<u>Subsequent Events:</u> The Bank has reviewed all events occurring from December 31, 2016 through March 21, 2017, the date the financial statements were available to be issued and no subsequent events occurred requiring accrual or disclosure.

<u>Use of Estimates:</u> The preparation of financial statements, in conformity with U.S. generally accepted accounting principles, requires management to make estimates and assumptions based on available information that affect the reported amounts in the financial statements and the disclosures provided, and actual results could differ.

<u>Cash Flows:</u> For purposes of reporting cash flows, cash and cash equivalents include cash, deposits with other financial institutions with maturities fewer than 90 days, and federal funds sold. Federal funds are sold for a one day period and are highly liquid investments. Net cash flows are reported for customer loan and deposit transactions, interest-bearing deposits in other financial institutions, and federal funds purchased.

<u>Interest-Bearing Deposits in Other Financial Institutions:</u> Interest bearing deposits in other financial institutions mature within five years and are carried at cost.

<u>Investment Securities</u>: Debt securities are classified as held to maturity and carried at amortized cost when management has the positive intent and ability to hold them to maturity. Debt securities are classified as available for sale when they might be sold before maturity. Equity securities with readily determinable fair values are classified as available for sale. Securities available for sale are recorded at fair value with unrealized holding gains and losses reported in other comprehensive income, net of tax. At the time of purchase, the Bank designates securities as either held to maturity or available for sale based on its investment objectives, operational needs, and intent.

Interest income includes amortization of purchase premium or discount. Premiums and discounts on securities are amortized on the level-yield method without anticipating prepayments, except for mortgage backed securities where prepayments are anticipated. Gains and losses on sales are recorded on the trade date and determined using the specific identification method.

An investment security is impaired when its carrying value is greater than its fair value. Management evaluates securities for other-than-temporary impairment ("OTTI") on at least a quarterly basis and more frequently when economic or market conditions warrant such an evaluation. For securities in an unrealized loss position, management considers the magnitude and duration of the decline and the intent and ability of the Bank to retain

its investment in the securities for a period of time sufficient to allow for an anticipated recovery in fair value, in addition to the reasons underlying the decline, to determine whether the loss in value is other than temporary. The term "other than temporary" is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment. If either of the criteria regarding intent or requirement to sell is met, the entire difference between amortized cost and fair value is recognized as impairment through earnings. For debt securities that do not meet the aforementioned criteria, the amount of impairment is split into two components as follows: 1) OTTI related to credit loss, which must be recognized in the income statement and 2) other-than-temporary impairment (OTTI) related to other factors, which is recognized in other comprehensive income. The credit loss is defined as the difference between the present value of the cash flows expected to be collected and the amortized cost basis. For equity securities, the entire amount of impairment is recognized through earnings.

<u>Loans Held for Sale:</u> Loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or fair value. Net unrealized losses, if any, are recorded as a valuation allowance and charged to earnings.

Loans held for sale are generally sold with servicing rights retained. The carrying value of loans sold is reduced by the amount allocated to the servicing right. If the loans are sold with servicing retained, the fair value of the servicing asset or liability is recorded on the balance sheet. Gains and losses on the sold portion of the loan is recognized at the time of sale based on the difference between the sale proceeds and the carrying value of the related loans sold.

<u>Loans</u>: Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the amount of unpaid principal balances outstanding, net of deferred loan fees and costs, and an allowance for loan losses. Interest income is accrued on the unpaid principal balance daily and credited to income as it is earned. When a loan pays off or is sold, any unamortized balance of any related premiums, discounts, loan origination fees, and direct loan origination costs is recognized in income. Loan origination fees, net of certain direct origination costs, are deferred and recognized in interest income over the expected life of the loan using a method that approximates the level yield method without anticipating prepayments.

Interest income on loans is generally discontinued and placed on non-accrual status at the time the loan is 90 days delinquent or when management believes, after considering economic and business conditions and collection efforts, that the borrower's financial condition is such that collection of interest is doubtful unless the loan is well-secured and in the process of collection. Past-due status is based on the contractual terms of the loan. A loan is moved to non-accrual status in accordance with the Bank's policy, typically after 90 days of non-payment. In all cases, loans are placed on non-accrual or charged-off at an earlier date if collection of principal or interest is considered doubtful. Non-accrual loans and loans past due 90 days still on accrual include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans.

When a loan is placed on non-accrual status, all interest previously accrued but not collected is reversed against current period interest income. Interest received on such loans is accounted for on the cash-basis method and recognized only to the extent that cash is received and where the future collection of principal is probable, until qualifying for return to accrual. Generally, loans will be restored to an accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

<u>Concentration of Credit Risk:</u> Most of the Bank's business activity is with customers located within Santa Cruz County. Therefore, the Bank's exposure to credit risk is significantly affected by changes in the economy in the Santa Cruz County area.

<u>Allowance for Loan Losses</u>: The allowance for loan losses is a valuation allowance for probable credit losses in the Bank's loan portfolio that have been incurred as of the balance sheet date. The allowance is established through a provision for loan losses which is charged to expense. Additions to the allowance are expected to

maintain the adequacy of the total allowance after credit losses and loan growth. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Cash received on previously charged-off amounts is recorded as a recovery to the allowance. Management estimates the allowance balance required using past loan loss experience, the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions, and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged-off.

The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired when, based on current information and events, it is probable that the Bank will be unable to collect all amounts due according to the contractual terms of the loan agreement. Generally, the Bank identifies loans to be reported as impaired when such loans are in non-accrual status or classified in part or in whole as either doubtful or loss. Loans for which the terms have been modified resulting in a concession, and for which the borrower is experiencing financial difficulties, are considered troubled debt restructurings (TDRs) and classified as impaired.

Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Commercial and commercial real estate loans over \$100,000 are individually evaluated for impairment. Typically, loans below \$100,000 from all class types are excluded from individual impairment analysis. When a loan is impaired, a portion of the allowance is allocated so that the loan is reported, net, at the present value of expected future cash flows discounted at the loan's effective interest rate, except that as a practical expedient, it may measure impairment based on a loan's observable market price, or the fair value of the collateral if the loan is collateral dependent. A loan is collateral dependent if the repayment of the loan is expected to be provided solely by the underlying collateral. Large groups of smaller balance homogeneous loans, such as consumer and residential real estate loans are collectively evaluated for impairment, and accordingly, they are not separately identified for impairment disclosures.

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the Bank, for economic or legal reasons related to the debtor's financial difficulties, grants a concession to the debtor that it would not otherwise consider. Restructured workout loans typically present an elevated level of credit risk as the borrowers are not able to perform according to the original contractual terms. Troubled debt restructurings are individually evaluated for impairment and included in the separately identified impairment disclosures. TDRs are measured at the present value of estimated future cash flows using the loan's effective rate at inception. If a TDR is considered to be a collateral dependent loan, the loan is reported, net, at the fair value of the collateral less estimated costs to sell. For TDRs that subsequently default, the Bank determines the amount of the allowance on that loan in accordance with the accounting policy for the allowance for loan losses on loans individually identified as impaired. The Bank incorporates recent historical experience related to TDRs including the performance of TDRs that subsequently default into the calculation of the allowance by loan portfolio segment.

The determination of the general reserve for loans that are not impaired is collectively evaluated and based on estimates made by management, to include, but not limited to, consideration of historical losses by portfolio segment, internal asset classifications, and qualitative factors to include economic trends in the Bank's service areas, industry experience and trends, geographic concentrations, estimated collateral values, the Bank's underwriting policies, the character of the loan portfolio, and probable losses inherent in the portfolio taken as a whole. The historical loss experience is determined by portfolio segment and is based on considerations of both the Bank's actual historical loss history and losses of the peer group in which the Bank operates over the most recent 8 years.

The Bank maintains a separate allowance for each portfolio segment (loan type). These portfolio segments include commercial real estate, land and construction, commercial and industrial, agricultural land, real estate and production, and consumer loans (principally home equity loans). Portfolio classes are not distinguished from segments for reporting purposes. The allowance for loan losses attributable to each portfolio segment, which includes both impaired loans and loans that are not impaired, is combined to determine the Bank's overall allowance, hence, is included on the balance sheet.

The general reserve component of the allowance for loan losses also consists of reserve factors that are based on management's assessment of the following for each portfolio segment: (1) inherent credit risk, (2) historical losses, and (3) other qualitative factors. These reserve factors are inherently subjective and are driven by the repayment risk associated with each portfolio segment described below.

**Commercial real estate** – Commercial real estate mortgage loans generally possess a higher inherent risk of loss than other real estate portfolio segments, except land and construction loans. Adverse economic developments or an overbuilt market impact commercial real estate projects and may result in troubled loans. Trends in vacancy rates of commercial properties impact the credit quality of these loans. High vacancy rates reduce operating revenues and the ability for properties to produce sufficient cash flow to service debt obligations.

**Land and construction** – Land and construction loans generally possess a higher inherent risk of loss than other real estate portfolio segments. A major risk arises from the necessity to complete projects within specified cost and timelines. Trends in the construction industry significantly impact the credit quality of these loans, as demand drives construction activity. In addition, trends in real estate values significantly impact the credit quality of these loans, as property values determine the economic viability of construction projects.

**Commercial and industrial** – Commercial and industrial loans generally possess a lower inherent risk of loss than real estate portfolio segments because these loans are generally underwritten to existing cash flows of operating businesses. Debt coverage is provided by business cash flows and economic trends influenced by unemployment rates and other key economic indicators are closely correlated to the credit quality of these loans.

**Agricultural land, real estate and production** – Agricultural real estate mortgage loans generally possess a lower inherent risk of loss than other real estate portfolio segments, including land and construction loans. Adverse economic developments may result in troubled loans. Loans secured by crop production and livestock are especially vulnerable to two risk factors that are largely outside the control of Bank and borrowers: commodity prices and weather conditions.

Consumer – Comprised of single family residential real estate, home equity lines of credit, personal lines and installment loans. The degree of risk in residential real estate lending depends primarily on the loan amount in relation to collateral value, the interest rate and the borrower's ability to repay in an orderly fashion. These loans generally possess a lower inherent risk of loss than other real estate portfolio segments. An installment loan portfolio is usually comprised of a large number of small loans scheduled to be amortized over a specific period. Most installment loans are made directly for consumer purchases, but business loans granted for the purchase of heavy equipment or industrial vehicles may also be included. Economic trends determined by unemployment rates and other key economic indicators are closely correlated to the credit quality of these loans. Weak economic trends indicate that the borrowers' capacity to repay their obligations may be deteriorating.

Although management believes the allowance to be adequate, ultimate losses may vary from its estimates. At least quarterly, the Board of Directors reviews the adequacy of the allowance, including consideration of the relative risks in the portfolio, current economic conditions and other factors. If the Board of Directors and management determine that changes are warranted based on those reviews, the allowance is adjusted. In addition, the Bank's

primary regulators, FDIC and CDBO, as an integral part of their examination process, review the adequacy of the allowance. These regulatory agencies may require additions to the allowance based on their judgment about information available at the time of their examinations.

<u>Servicing Rights:</u> When loans are sold with servicing retained, servicing rights are initially recorded at fair value with the income statement effect recorded in gains on sales of loans. Fair value is based on market prices for comparable mortgage servicing contracts, when available or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. All classes of servicing assets are subsequently measured using the amortization method which requires servicing rights to be amortized into noninterest income in proportion to, and over the period of, the estimated future net servicing income of the underlying loans.

Servicing rights are evaluated for impairment based upon the fair value of the rights as compared to carrying amount. Impairment is determined by stratifying rights into groupings based on predominant risk characteristics, such as interest rate, loan type and investor type. Impairment is recognized through a valuation allowance for an individual grouping, to the extent that fair value is less than the carrying amount. If the Bank later determines that all or a portion of the impairment no longer exists for a particular grouping, a reduction of the allowance may be recorded as an increase to income. Changes in valuation allowances are reported with loan servicing fees income on the income statement. The fair values of servicing rights are subject to significant fluctuations as a result of changes in estimated and actual prepayment speeds and default rates and losses.

Servicing fee income, which is reported on the income statement as loan servicing fees, is recorded for fees earned on servicing loans. The fees are based on a fixed amount per loan and recorded as income when earned. The amortization of servicing rights is netted against loan servicing fee income.

Servicing fees totaled \$613,187 and \$565,882 for the years ended December 31, 2016 and 2015, respectively. Late fees and ancillary fees related to loan servicing are not material.

<u>Real Estate Owned:</u> Assets acquired through or instead of foreclosure are initially recorded at fair value of the property, less estimated selling expenses, establishing a new cost basis. Any write-down to fair value at the time of transfer to foreclosed real estate is charged to the allowance for loan losses. These assets are subsequently accounted for at lower of cost or fair value less estimated costs to sell. If fair value declines subsequent to foreclosure, a valuation allowance is recorded through expense. Operating costs incurred after acquisition and in conjunction with the maintenance of real estate acquired through foreclosure are charged to expense as incurred.

<u>Premises and Equipment:</u> Premises and equipment are stated at cost less accumulated depreciation and amortization. Leasehold improvements are amortized over the shorter of the estimated useful life or the initial term of the respective leases. Certain operating leases contain incentives in the form of tenant improvement allowances or credits. Lease incentives are capitalized at the inception of the lease and amortized on a straight-line basis over the original lease term with useful lives ranging from 3 to 10 years. Furniture, fixtures and equipment are depreciated using the straight line method with useful lives ranging from 5 to 7 years. All other maintenance and repair expenditures are expensed as incurred.

<u>Federal Home Loan Bank Stock:</u> The Bank, as a member of the Federal Home Loan Bank ("FHLB") system, is required to maintain an investment in the capital stock of the FHLB of San Francisco based on the level of borrowings and other factors, and may invest in additional amounts. FHLB stock is carried at cost, classified as restricted security, and periodically evaluated for impairment based on ultimate recovery of par value. The FHLB stock is redeemable at its par value of \$100 per share at the discretion of the FHLB of San Francisco. The FHLB can suspend dividends and redemptions upon notification to its members. Both cash and stock dividends, if any, are reported as income.

<u>Pacific Coast Bankers Bank Stock:</u> Pacific Coast Bankers Bank ("PCBB") stock is carried at cost, classified as restricted security, and periodically evaluated for impairment based on ultimate recovery of par value. Both cash and stock dividends, if any, are reported as income.

<u>Bank Owned Life Insurance</u>: The Bank has purchased life insurance policies on certain key executives. Bank owned life insurance is recorded at the amount that can be realized under the insurance contract at the balance sheet date, which is the cash surrender value adjusted for other charges or other amounts due that are probable at settlement.

<u>Loan Commitments and Related Financial Instruments:</u> Financial instruments include off balance sheet credit instruments, such as commitments to make loans and commercial letters of credit, issued to meet customer financing needs. The face amount for these items represents the exposure to loss, before considering customer collateral or ability to repay. Such financial instruments are recorded when they are funded.

<u>Stock-Based Compensation:</u> Compensation cost is recognized for stock options and restricted stock awards issued to employees and directors, based on the fair value of these awards at the date of grant. The Bank estimates the fair value of each stock option award as of the date of grant using a Black-Scholes-Merton model, while the market price of the Bank's common stock at the date of grant is used for restricted stock awards. Compensation cost is recognized over the required service period, generally defined as the vesting period.

Income Taxes: Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred income taxes are computed using the asset and liability method, which represents the tax effects for the temporary differences between carrying amounts and tax bases of assets and liabilities, based on current tax law, of future deductible or taxable amounts attributable to events that have been recognized in the financial statements. A valuation allowance is established to reduce the deferred tax asset to the level at which it is "more likely than not" that the tax asset or benefits will be realized. Deferred tax assets and liabilities are calculated by applying current enacted tax rates against future deductible or taxable amounts. Realization of tax benefits of deductible temporary differences and operating loss carry forwards depends on having sufficient taxable income of an appropriate character within the carry forward periods.

The Bank uses a comprehensive model for recognizing, measuring, presenting and disclosing in the financial statements tax positions taken or expected to be taken on a tax return. A tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded.

The Bank recognizes interest and/or penalties related to income tax matters in income tax expense.

<u>Retirement Plans:</u> Pension expense is the net of service and interest cost, return on plan assets and amortization of gains and losses not immediately recognized. Employee 401(k) plan expense is the amount of matching contributions. Deferred compensation and supplemental retirement plan expense allocates the benefits over years of service.

<u>Earnings Per Common Share:</u> Basic earnings per common share are calculated by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted earnings per common share takes into account the potential dilutive impact of such instruments and uses the average share price for the period in determining the number of incremental shares to add to the weighted-average number of shares outstanding. There is no adjustment to the number of outstanding shares for potential dilutive instruments, such as stock options, when a loss occurs because the conversion of potential common stock is anti-dilutive or when stock options are not in-the-money.

<u>Comprehensive Income</u>: Comprehensive income consists of net income and other comprehensive (loss) income. Other comprehensive income includes the adjustment to fully recognize the liability associated with the supplemental executive retirement plan and unrealized gains and losses on securities available for sale, which are also recognized as separate components of equity.

<u>Loss Contingencies</u>: Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated.

<u>Dividend Restriction:</u> Banking regulations require maintaining certain capital levels and may limit the dividends paid by the Bank to shareholders.

<u>Fair Value of Financial Instruments:</u> The Bank's estimated fair value amounts have been determined by the Bank using relevant market information and other assumptions, as more fully disclosed in a separate note. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments, and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect these estimates.

<u>Reclassifications</u>: Certain reclassifications have been made to prior period financial statements to conform to the current year presentation. These reclassifications had no impact on the Bank's previously reported financial statements.

#### **ADOPTION OF NEW ACCOUNTING STANDARDS**

The following are descriptions of recently adopted or newly issued not yet effective accounting standards that could have a material effect on our financial statements:

#### ASU 2014-09, Revenue From Contracts With Customers:

In May 2014 the FASB amended existing guidance related to revenue from contracts with customers. This amendment supersedes and replaces nearly all existing revenue recognition guidance, including industry-specific guidance, establishes a new control-based revenue recognition model, changes the basis for deciding when revenue is recognized over time or at a point in time, provides new and more detailed guidance on specific topics and expands and improves disclosures about revenue. In addition, this amendment specifies the accounting for some costs to obtain or fulfill a contract with a customer. These amendments are effective for public business entities for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early application is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that period. The amendments should be applied retrospectively to all periods presented or retrospectively with the cumulative effect recognized at the date of initial application. The Bank is currently evaluating the impact of this new accounting standard on the financial statements.

#### ASU 2016-02, Leases:

In February 2016 the FASB amended existing guidance that requires lessees recognize the following for all leases (with the exception of short-term leases) at commencement date (1) A lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and (2) A right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Under the new guidance, lessor accounting is largely unchanged. Certain targeted improvements were made to align, where necessary, lessor accounting with the lessee accounting model and Topic 606, Revenue from Contracts with Customers. These amendments are effective for public business entities for annual reporting periods beginning after December 15, 2018, including interim periods within that reporting period. Early application is permitted upon issuance. Lessees (for capital and operating leases) and lessors (for sales-type, direct financing, and operating leases) must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified retrospective approach would not require any transition accounting for leases that expired before the earliest comparative period presented. Lessees and lessors may not apply a full retrospective transition approach. The Bank is currently evaluating the impact of this new accounting standard on the financial statements.

#### ASU 2016-13, Financial Instruments - Credit Losses (Topic 326):

In June 2016, FASB issued guidance to replace the incurred loss model with an expected loss model, which is referred to as the current expected credit losses (CECL) model. The CECL model is applicable to the measurement of credit losses on financial assets measured at amortized cost, including loan receivables, heldto-maturity debt securities, and reinsurance receivables. It also applies to off-balance sheet credit exposures not accounted for as insurance (loan commitments, standby letters of credit, financial guarantees, and other similar instruments) and net investments in leases recognized by a lessor. For debt securities with other-than-temporary impairment (OTTI), the guidance will be applied prospectively. Existing purchased credit impaired (PCI) assets will be grandfathered and classified as purchased credit deteriorated (PCD) assets at the date of adoption. The asset will be grossed up for the allowance for expected credit losses for all PCD assets at the date of adoption and will continue to recognize the noncredit discount in interest income based on the yield of such assets as of the adoption date. Subsequent changes in expected credit losses will be recorded through the allowance. For all other assets within the scope of CECL, a cumulative-effect adjustment will be recognized in retained earnings as of the beginning of the first reporting period in which the guidance is effective. These amendments are effective for annual reporting periods beginning after December 15, 2020, including interim periods within that reporting period. Early application is permitted for fiscal years after December 15, 2018, including interim periods within that reporting period.

#### **NOTE 2. INVESTMENT SECURITIES**

The following tables summarize the amortized cost and fair value of securities available for sale and held to maturity at December 31, 2016, and 2015 and the corresponding amounts of gross unrealized gains and losses recognized in accumulated other comprehensive income (loss) and gross unrecognized gains and losses:

There were no transfers between available for sale and held to maturity during 2016 or 2015.

The proceeds from sales and calls of investment securities and the associated gains and losses during 2016 and 2015 are listed below:

	<u>2016</u>	<u>2015</u>
Proceeds	1,543,100	1,530,347
Gains	50,688	1,453
Losses	_	_

The tax provision related to the net realized gains was \$20,861 and \$598 for year-ends 2016 and 2015, respectively. The bank did not recognize any losses on securities during 2016 or 2015.

The amortized cost and estimated fair value of debt securities are shown by contractual maturity. Expected maturities may differ from contractual maturities if borrowers have the right to call or prepay obligations with or without call or prepayment penalties. Securities not due at a single maturity date are shown separately.

Collateralized mortgage obligations	\$	3,013,713	\$	(5,323)	\$	-	\$	-	\$ :	3,013,713	\$	(5,323)	
Total available for sale:	\$	3,013,713	\$	(5,323)	\$	-	\$	-	\$ :	3,013,713	\$	(5,323)	

Unrealized losses on corporate bonds have not been recognized into income because the issuers bonds are of high credit quality (rated AA or higher), management does not intend to sell and it is likely that management will not be required to sell the securities prior to their anticipated recovery, and the decline in fair value is largely due to changes in interest rates and other market conditions. The issuers continue to make timely principal and interest payments on the bonds. The fair value is expected to recover as the bonds approach maturity.

As of December 31, 2016, the Bank's security portfolio consisted of 137 investment securities, 32 of which were in an unrealized loss position less than twelve months and none over twelve months. The majority of unrealized losses are related to the Bank's collateralized mortgage obligations and U.S. government sponsored agencies as discussed below.

#### **Collateralized Mortgage Obligations:**

At December 31, 2016, 100% of the collateralized mortgage obligations held by the Bank were issued by U.S. Government or government-sponsored entities and agencies, primarily Fannie Mae and Freddie Mac, institutions which the government has affirmed its commitment to support. Because the decline in fair value is attributable to changes in interest rates and illiquidity, and not credit quality, and because the Bank does not have the intent to sell these mortgage backed securities and it is likely that it will not be required to sell the securities before their anticipated recovery, the Bank does not consider these securities to be other-than-temporarily impaired at December 31, 2016. The Bank's mortgage backed securities portfolio does not include non-agency collateralized mortgage obligations.

#### **NOTE 3. LOANS RECEIVABLE**

The outstanding loan portfolio balances at December 31, 2016 and 2015 are as follows:

	Decemb	per 31,
	<u>2016</u>	<u>2015</u>
Commercial and industrial Commercial real estate Land and construction Agricultural land, real estate and production Consumer Gross loans receivable	\$ 92,668,532 201,250,906 43,813,207 18,535,459 26,897,775 383,165,879	\$ 88,263,714 155,513,191 27,424,918 11,913,756 32,701,492 315,817,071

The recorded investment in loans excludes accrued interest receivable and loan origination fees, net due to immateriality. For purposes of this disclosure, the unpaid principal balance is not reduced for partial charge-offs.

Non-accrual loans and loans past due 90 days still on accrual include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans.

The Bank had no loans in non-accrual or past due over 90 days still on accrual as of December 31, 2016 and December 31, 2015.

The following table presents the aging of the recorded investment in past due loans as of December 31, 2016 by class of loans:

	(	30 - 59	60 - 89		Greater Than

The Bank had no past-due loans as of December 313 2020515

#### **Troubled Debt Restructurings:**

As of December 31, 2016 and 2015, the Bank had no troubled debt restructurings.

#### **Credit Quality Indicators:**

The Bank assigns a risk rating category to all loans based on relevant information about the ability of borrowers to service their debt such as: current financial condition of borrowers and guarantors, historical payment experience, credit documentation, public information, and current economic trends. The Bank performs detailed reviews for sample loans over \$300,000 along with a smaller sample of loans under \$300,000 as well as all loans with an outstanding balance greater than \$1,500,000 to identify credit risks and to assess the overall collectability of the portfolio. The analysis is performed on a semi-annual basis. These risk ratings are also subject to examination by independent specialists engaged by the Bank and the Bank's regulators. The risk ratings can be grouped into five major categories, defined as follows:

**Pass** – A pass loan is a credit with no existing or known potential weaknesses deserving of management's close attention.

**Special Mention** – A special mention loan has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or in the Bank's credit position at some future date. Special Mention loans are not adversely classified and do not expose the Bank to sufficient risk to warrant adverse classification.

**Substandard** – A substandard loan is not adequately protected by the current sound worth and paying capacity of the borrower or the value of the collateral pledged, if any. Loans classified as substandard have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. Well defined weaknesses include a project's lack of marketability, inadequate cash flow or collateral support, failure to complete construction on time or the project's failure to fulfill economic expectations. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.

**Doubtful** – Loans classified doubtful have all the weaknesses inherent in those classified as substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently known facts, conditions and values, highly questionable, and improbable.

**Loss** – Loans classified as loss are considered uncollectible and charged off immediately.

The following table shows the loan portfolio by class allocated by management's internal risk ratings at December 31, 2016 and 2015:

December 31, 2016	Commercial and Industrial	Commercial Real Estate	Land and Construction	Agricultural Land, Real Estate and Production	Consumer	Total
Pass	\$ 89,315,917	\$ 193,314,605	\$ 43,813,207	\$ 18,535,459	\$ 26,897,775	\$ 371,876,963

#### **NOTE 4. REAL ESTATE OWNED**

The Bank currently owns one property with no recorded investment. There were no loans foreclosed during 2016 and 2015.

Real estate owned expenses during the year have been incurred to maintain the property for its potential for sale in the future. Expenses related to real estate owned include:

	<u>2016</u>	<u>2015</u>
Net gain on sales Write-downs	\$ -	\$ -
Operating expenses, net of rental income	 4,537	7,918
	\$ 4,537	\$ 7,918

#### **NOTE 5. FAIR VALUE**

#### Fair Value Hierarchy:

Fair Value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Bank groups its assets and liabilities measured at fair value in three levels. Valuations within these levels are based upon:

Level 1 – Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2 – Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 – Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Bank used the following methods and significant assumptions to estimate fair value:

Cash and Cash Equivalents: The carrying amount of cash and cash equivalents is a reasonable estimate of fair value and are classified as Level 1.

*Interest-Bearing Deposits in Other Financial Institutions:* The fair values were calculated using discounted cash flow models based on market rates resulting in a Level 2 classification.

Investment Securities: The fair values of securities classified as available for sale and held to maturity are based on quoted market prices, if available (Level 1) at the reporting date. For securities where quoted prices are not available, fair values are calculated based on market prices of similar securities (Level 2), using matrix pricing. Matrix pricing is a mathematical technique commonly used to price debt securities that are not actively traded, values debt securities without relying exclusively on quoted prices for the specific securities but rather relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs). For securities where quoted prices or market prices of similar securities are not available, fair values are calculated using discounted cash flows or other market indicators (Level 3).

**Loans Held For Sale:** Loans held for sale are carried at the lower of cost or fair value, which is evaluated on a pool-level basis. The fair value of loans held for sale is determined using quoted prices for similar assets, adjusted for specific attributes of that loan or other observable market data, such as outstanding commitments from third party investors (Level 2).

**Loans:** The fair value of fixed rate loans is determined as the present value of expected future cash flows discounted at the current interest rate that represents a mix of residential and commercial real estate. The market rate is initially set at the 30-year mortgage rate resulting in a Level 3 classification. Variable rate loans that reprice frequently with changes in approximate market rates were valued using the outstanding principal balance resulting in a Level 3 classification. The estimated fair value of loan commitments and contingent liabilities at December 31, 2016 and December 31, 2015 approximate their current book values.

**Impaired Loans:** The fair value of impaired loans with specific allocations of the allowance for loan losses is generally based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available for similar loans and collateral underlying such loans resulting in a Level 3 classification of the inputs for determining fair value.

**Bankers' Bank Stock:** Bankers' Bank Stock includes Federal Home Loan Bank Stock and Pacific Coast Bankers Bank Stock. The Federal Home Loan Bank investment is carried at cost and is redeemable at par with certain restrictions. It is not practical to determine fair value of bank stock due to restrictions placed on transferability.

**Accrued Interest Receivable/Payable:** The respective carrying values of certain on-balance-sheet financial instruments approximated their fair values. These financial instruments include accrued interest receivable and accrued interest payable. Carrying values were assumed to approximate fair values for these financial instruments as they are short term in nature and their recorded amounts approximate fair values or are receivable or payable on demand. The Bank does not use derivative financial instruments. The carrying amounts of accrued interest approximate their fair value resulting in a Level 2 or Level 3 classification.

**Deposits:** The fair values of demand deposits, savings deposits, and money market deposits without defined maturities were the amounts payable on demand at the reporting date resulting in a Level 1 classification. For variable rate deposits where the Bank has the contractual right to change rates, carrying value was assumed to approximate fair value resulting in a Level 1 classification.

**Certificates of Deposit:** For deposits with defined maturities, the fair values were calculated using discounted cash flow models based on market interest rates for different product types and maturity dates. The discount rates used were based on rates for comparable deposits resulting in a Level 2 classification.

#### Assets Recorded at Fair Value

The Bank's assets and liabilities measured at fair value on a recurring and non-recurring basis as of December 31, 2016 and 2015 are summarized below:

#### **Recurring Basis**

The Bank is required or permitted to record the following assets at fair value on a recurring basis.

		Decemb	er 31, 2016	
		Quoted Prices in		Significant
		Active Markets for	Significant Other	Unobservable
		Identical Assets	Observable Inputs	Inputs
	Fair Value	( <u>Level 1)</u>	(Level 2)	(Level 3)
Securities available for sale:		,	<del>,</del>	
U.S. government sponsored agencies	\$ 5,993,529	\$ -	\$ 5,993,529	\$ -
Mortgage backed securities: residential	-	-	-	-
Collateralized mortgage obligations	9,846,144	-	9,846,144	-
State and political subdivision	1,719,306	-	1,719,306	-
Corporate	392,999	-	392,999	-
Total assets measured at fair value	\$ 17,951,978	\$ -	\$ 17,951,978	\$ -
			er 31, 2015	
		Quoted Prices in		Significant
		Active Markets for	Significant Other	Unobservable
		Identical Assets	Observable Inputs	Inputs
	Fair Value	( <u>Level 1)</u>	( <u>Level 2)</u>	( <u>Level 3)</u>
Securities available for sale:				
U.S. government sponsored agencies	\$ 3,027,820	\$ -	\$ 3,027,820	\$ -
Mortgage backed securities: residential	-	-	-	-
Collateralized mortgage obligations	7,142,262	-	7,142,262	-
State and political subdivision	360,940	-	360,940	-
Corporate	104,576	=	104,576	
Total assets measured at fair value	\$ 10,635,598	\$ -	\$ 10,635,598	\$ -

There were no transfers between Level 1 and Level 2 during 2016 and 2015. There were no recurring Level 3 assets or liabilities measured at fair value during 2016 or 2015.

#### Non-recurring Basis

The Bank may be required, from time to time, to measure certain assets at fair value on a non-recurring basis. These include assets that are measured at the lower of cost or market value that were recognized at fair value which was below cost at the reporting date:

December 31, 2016:

Management monitors the availability of observable market date to assess the propriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

Management evaluates the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total assets, total liabilities or total earnings.

There were no transfers between Level 1, Level 2, and Level 3 during 2016.

#### **NOTE 6. LOAN SERVICING**

Activity for loan servicing rights follows:

	2016	2015
Loan servicing rights:		
Beginning of year	\$ 728,482	\$ 720,690
Additions	590,553	283,524
Disposals	-	_
Amortized to expense	(496,248)	(275,732)
End of year	\$ 822,787	\$ 728,482

The Bank reviews servicing rights for impairment periodically and there was no valuation allowance recorded in 2016 or 2015.

#### **NOTE 7. PREMISES AND EQUIPMENT**

The following presents the cost of premises and equipment including leasehold improvements and the related accumulated depreciation and amortization at December 31, 2016 and 2015:

	December 31,			
	2016	2015		
Leasehold improvements	\$ 1,747,411	\$ 1,747,411		
Furniture, fixtures and equipment	1,461,799	1,735,066		
Software and capitalized data & item processing	140,453	234,425		
Computer equipment	626,028	710,668		
Construction-in-progress	248,439	6,250		
Total premises and equipment	4,224,130	4,433,820		
Less accumulated depreciation and amortization	(3,550,555)	(3,899,098)		
Premises and equipment, net	\$ 673,575	\$ 534,722		

Depreciation expense was \$208,166 and \$268,737 for 2016 and 2015, respectively.

<u>Operating Leases</u>: The Bank leases certain branch properties and equipment under long-term operating lease agreements. These leases expire on various dates through 2022 and have various renewal options of five years each. Some leases may include a free rent period or have net operating costs associated with them.

In addition to the office building leases, the Bank has two leases for ATM and night depository kiosks. The operating leases had initial terms of five years each and various renewal options of three years each.

Building and kiosk rent expense for the years ended December 31, 2016 and 2015, was approximately \$612,000 and \$607,000, respectively. Lease commitments, before considering renewal options that generally are present, for future years are as follows:

Year ending December 31,						
2017	619,000					
2018	446,000					
2019	195,000					
2020	134,000					
2021	75,000					
2022	13,000					
	\$ 1,482,000					

#### NONTETRE BEPRETROTS

Interest-bearing deposits consisted of the following:

	December 31,					
		2016	2015			
NOW accounts	\$	70,533,664	\$	58,796,110		
Money Markets		112,600,993		99,096,629		
Time Deposits		72,230,372		70,614,984		
Savings		29,049,110		24,791,348		
Total interest-bearing deposits	\$	284,414,139	\$	253,299,071		

Time deposits that meet or exceed the FDIC Insurance limit of \$250,000 at yearend 2016 and 2015 were \$33,460,483 and \$27,264,866, respectively.

The scheduled maturities for all time deposits for the next five years were as follows:

	 2016				
2017	\$ 70,551,326				
2018	516,579				
2019	423,883				
2020	643,772				
2021	 94,812				
	\$ 72,230,372				

AsAof Decoember 131, **20**1620the Banek Bhackbhackerhed klepeositherpotaling \$9000,61\$90006\$3,250d3\$8 265000650mber 31, 2015.

#### **NOTE 9. BORROWED FUNDS**

At December 31, 2016, the Bank had federal funds borrowing guidance lines with its correspondent banks in an aggregate amount of \$11,000,000 on an unsecured basis. In addition, the Bank has established a secured borrowing arrangement, secured by loans totaling approximately \$221,303,608, with the Federal Home Loan Bank of San Francisco ("FHLB"). As of December 31, 2016, the Bank had \$122,830,611 in borrowing capacity available through the FHLB under which overnight and term advances were available. These advances are secured by assets including the Bank's ownership interest in the capital stock of the FHLB, securities and loans.

The Bank had no borrowed funds outstanding at December 31, 2016 and December 31, 2015 under these arrangements.

#### NOTE 10. PENSION AND OTHER POSTRETIREMENT BENEFIT PLANS

Effective October 1, 2004, the Bank established the Supplemental Executive Retirement Plan (SERP), an unfunded noncontributory defined benefit pension plan. The SERP provides retirement benefits to a select group of key executives and senior officers based on years of service and final average salary. The Bank uses December 31 as the measurement date for this Plan.

The following table reflects the changes in obligations and plan assets of the defined benefit pension plan for the years ended December 31, 2016 and 2015.

	2016	 2015
Change in benefit obligation		
Beginning benefit obligation	\$ 2,422,502	\$ 2,345,665
Service cost	111,418	110,243
Interest cost	95,332	84,862
Actuarial gain	(515)	(76,907)
Benefits paid	 (42,395)	(41,361)
Ending benefit obligation	2,586,342	2,422,502
Change in plan assets		
Beginning plan assets	-	-
Employer contributions	42,395	41,361
Benefit payments	 (42,395)	 (41,361)
Ending plan assets	_	_
Funded status at end of year	(2,586,342)	 (2,422,502)

The following table reflects the amounts recognized in accumulated other comprehensive income for the years ended December 31, 2016 and 2015.

Change in benefit obligation	2016	2015
Unrecognized net actuarial gain	(153,364)	(152,849)
Unrecognized prior service cost		4,490
Net liability recognized in earnings	(153,364)	(148,359)

The components of net periodic benefit cost for the years ended December 31, 2016 and 2015 and forecasted net periodic benefit cost during the year ended December 31, 2017 are as follows:

	Year ended December 31,					
	2017			2016		2015
Components of net periodic benefit cost	(forecast)					
Service cost	\$	116,039	\$	111,418	\$	110,243
Interest cost  Amortization of prior service cost		98,481 -		95,332 4,490		84,862 8,480
Net periodic benefit cost	\$	214,520	\$	211,240	\$	203,585

#### As**s**umptions

Weighted average assumptions used to determine pension benefit obligations and net periodic pension cost as of yearend December 31, 2016:

	<u>2016</u>	<u>2015</u>
Discount rate used to determine net periodic benefit cost	3.97%	3.65%
Discount rate used to determine benefit obligations	3.84%	3.97%
Future salary increases	N/A	N/A

#### **NOTE 11. EMPLOYEE BENEFIT PLANS**

<u>401(k) Plan:</u> All employees of the Bank are eligible to participate in the Bank's 401(k) Plan, which is a tax-deferred savings plan designed to assist employees in preparing for their retirement years. The 401(k) Plan allows employees to contribute to the Plan up to certain limits prescribed by the Internal Revenue Service. The Bank implemented a matching program during 2013 and matches up to 25% of contributions up to 3% of compensation in 2015 and up to 4% of compensation beginning May 2016. Total expense for the years ended December 31, 2016 and December 31, 2015 was \$110,809 and \$78,500, respectively.

The Bank accounts for split-dollar life insurance in accordance with ASC 715-60, Compensation - Nonretirement Postemployment Benefits, which requires that endorsement split-dollar life insurance arrangements which provide a postretirement benefit to an employee be recorded based on the substance of the agreement with the employee. If the employer has effectively agreed to provide the employee with a death benefit, the employer should accrue, over the service period, a liability for the actuarial present value of the future death benefit as of the employee's expected retirement date. The total liability recorded as of years ended December 31, 2016 and December 31, 2015 was \$1,076,539 and \$998,531, respectively. Total expense recognized during the years ended December 31, 2016 and December 31, 2015 was \$124,912 and \$283,829, respectively.

#### **NOTE 12. INCOME TAXES**

The provision for income taxes is as follows for the years ended December 31, 2016 and 2015:

		2016		2015
Current expense:				
Federal	\$	3,529,913	\$	2,912,208
State		1,488,296		1,193,538
Total current		5,018,209		4,105,746
Deferred expense:				
Federal	\$	(553,499)	\$	(494,467)
State		(253,164)		(154,296)
Total deferred		(806,663)		(648,763)
Total provision	\$	4,211,546	\$	3,456,983
	<u> </u>	-,=,-	7	-,,

The effective tax rates differ from the federal statutory rate of 34% applied to income before income taxes due to the following for the years ended December 31, 2016 and 2015:

	2016	2015
Federal statutory rate	34.00%	34.00%
State income tax, net of federal effect	7.62%	7.71%
Tax exempt interest	(2.08%)	(2.96%)
Bank owned life insurance	(0.56%)	(0.69%)
Split dollar expense	0.25%	1.09%
Stock-based compensation	(0.07%)	0.56%
Other	0.19%	(0.83%)
Net	39.35%	38.88%

Delerfed idcome taxes are the result of diffed iffices betwheen income tax accounting and acdounting principles generally accepted in the United States of America, with respect to income and expense recognition. The tax effects of temporary differences that gave rise to deferred tax assets and deferred tax liabilities at December 31, 2016 and 2015 are as follows:

	 2016	2015
Allowance for loan losses	\$ 3,101,020	\$ 2,665,674
Deferred compensation	1,127,509	1,058,022
Accruals	1,452,433	1,155,978
Current state income tax	477,132	380,654
Premises and equipment	25,946	22,574
Unrealized (gain) loss on available for sale		
securities and pension	20,692	
Other deferred tax assets	210,061	205,716
Gross deferred tax assets	6,414,793	5,488,618
Deferred loan costs Unrealized (gain) loss on available for sale	(1,410,897)	(1,304,952)
securities and pension		(27,602)
Other deferred tax liabilities	(76,569)	(83,694)
Gross deferred tax liabilities	(1,487,466)	(1,416,248)
Net deferred tax asset	\$ 4,927,327	\$ 4,072,370

Management believes, that it is more likely than not, that the deferred tax assets will be realized as a result of expected continued profitability. Accordingly, no valuation allowance has been established as of December 31, 2016 or December 31, 2015.

The Bank files income tax returns in the United States and California jurisdictions. Unrecognized tax benefits are not expected to significantly increase or decrease within the next twelve months. The Bank's federal and state tax returns for the years 2013 to 2016 and 2012 to 2016, respectively, are currently open for examination.

The bank did not have any interest and penalties recorded in the income statement for the year ended December 31, 2016 and December 31, 2015.

#### NOTE 13. RELATED PARTY TRANSACTIONS

Loan related activity to directors, officers, and principal shareholders and their associates for the years ended December 31, 2016 and 2015 is as follows:

	 2016	2015
Beginning balance	\$ 1,054,751	\$ 1,242,736
New loans or disbursements	242,353	253,423
Principal repayments	(257,524)	(441,408)
Ending balance	\$ 1,039,580	\$ 1,054,751

At December 31, 2016 and 2015, no related party loans were on nonaccrual or classified for regulatory reporting purposes.

Deposits from principal officers, directors, and their affiliates at year end 2016 and 2015 were \$1,202,175 and \$815,489, respectively.

#### **NOTE 14. STOCK-BASED COMPENSATION**

The Bank has three share based compensation plans as described below. Total compensation cost that has been charged against income for those plans was \$180,800 and \$199,907 for 2016 and 2015, respectively. The total income tax benefit recorded to additional paid in capital was \$47,836 and \$13,216 for 2016 and 2015, respectively.

<u>2003 Stock Option Plan:</u> The Bank adopted a qualified stock option plan (the "Option Plan") for employees, non-employee directors and Bank founders, under which a maximum of 500,202 shares of Bank's common stock may be issued. The Option Plan calls for the exercise prices of the options to be equal to or greater than the fair market value of the stock at the time of grant. Options granted to Bank founders who are not also Bank directors or Bank officers were fully vested upon the date of grant. All other options shares granted have daily vesting over the first four years of the option contract. All option contracts for founders who are not also Bank directors or Bank officers have expiration dates of 10 years from the date of grant. All director and employee option contracts have expiration dates on the earlier of termination of service or 10 years from the date of grant. The Option Plan expired during 2014 and was replaced with the 2014 Omnibus Plan (the "Omnibus Plan").

All options granted under the Option Plan have a 10 year term and have been issued with exercise prices at the fair market value of the underlying shares at the date of grant. The non-qualified stock option awards to the organizers vested 100% immediately, whereas regular stock option awards to directors and employees vest over a four year period from the date the options were granted.

The Bank estimates the fair value of each option award as of the date of grant using a Black-Scholes-Merton option pricing formula and the following assumptions. Expected volatility is based on historical volatility of similar entities over a preceding period commensurate with the expected term of the option because the Bank's common stock has been publicly traded for a shorter period than the expected term for the options. The "simplified" method

described in the Securities and Exchange Commission's Staff Accounting Bulletin No. 110 is used to determine the expected term of the options due to the lack of sufficient historical data. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant with substantially the same term as the expected term of the option. There were no options granted during the years ended 2016 and 2015.

The following is a summary of the activity relating to the Bank's stock option plan for the year ended December 31, 2016 as presented below:

			Weighted Average	
		Weighted Average	Remaining Contractual	Aggregate Intrinsic
	Shares	Exercise Price	Life	Value
Options outstanding at beginning of year	76,959	\$15.02		
Granted	-	-		
Exercised	(25,635)	\$15.98		
Expired	(1,000)	\$28.00		
Forfeited	(12,215)	\$16.65		
Options outstanding at end of year	38,109	\$13.51	3.29 years	\$990,580
Options fully vested and expected to vest	38,078			\$989,887
Exercisable at end of year	37,971	\$13.49	3.28 years	\$987,495

Information related to the stock option plan during the year follows:

	<u>2016</u>
Intrinsic value of options exercised	\$ 350,381
Cash received from option exercises	409,741
Tax benefit realized from option exercises	37,671
Weighted average fair value of options granted	-

As of December 31, 2016, there was \$888 of total unrecognized compensation cost related to non-vested stock options granted under the plan. The cost is expected to be recognized over a weighted average period of 0.58 years.

<u>2014 Omnibus Plan:</u> The Bank adopted the Omnibus Plan in May 2014 for employees and non-employee directors, which will continue in effect until February 19, 2024. The Omnibus Plan allows qualified stock option grants for employees and non-qualified restricted stock awards for officers and non-employee directors. The maximum number of shares of common stock that may be issued under this plan is 427,246 unless amended by the Board or the shareholders of the Bank.

The Omnibus Plan permits the grant of nonstatutory options, incentive stock options and restricted stock awards to directors and employees of the Bank. Options granted under the Omnibus Plan may be incentive stock options or non-statutory stock options, as determined by the plan administrator at the time of grant of an option, however incentive stock options may be granted only to employees. In addition, restricted stock awards may be granted under the Omnibus Plan to directors and employees.

The per share exercise price for the shares to be issued upon exercise of any option shall be such price as is determined by the plan administrator, but no less than 100 percent of the fair market value per share on the date of grant. All option contracts have expiration dates on the earlier of termination of service or 10 years from the date of grant.

The Bank estimates the fair value of each option award as of the date of grant using a Black-Scholes-Merton option pricing model and the following assumptions. Expected volatility is based on historical volatility of similar entities over a preceding period commensurate with the expected term of the option because the Bank's common stock is not actively traded. The "simplified" method described in the Securities and Exchange Commission's Staff Accounting Bulletin No. 110 is used to determine the expected term of the options due to the lack of sufficient historical data. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant with substantially the same term as the expected term of the option.

The following weighted average assumptions as of grant date used for 2016 and 2015 are as follows:

	2016
Expected life (yrs.)	6.00
Volatility	35.53% - 42.01%
Risk-free rate of return	1.26%
Dividend yield	0.51%

The following is a summary of the activity relating to the Bank's stock award plan, which includes incentive stock options and restricted stock awards for the year ended December 31, 2016 as presented below:

			Weighted Average	Aggragata
		Weighted Average	Remaining Contractual	Aggregate Intrinsic
_	Shares	Exercise Price	Life	Value
Options outstanding at beginning of year	37,200	\$15.10		
Granted	3,000	\$26.46		
Exercised	(4,300)	\$25.50		
Forfeited or expired	· -	-		
Options outstanding at end of year	35,900	\$17.86	8.02 years	\$776,825
Options fully vested and expected to vest	32,861			\$722,973
Exercisable at end of year	15,921	\$20.65	7.68 years	\$300,171

As of December 31, 2016, there was \$230,514 of total unrecognized compensation cost related to non-vested stock options granted under the plan. The cost is expected to be recognized over a weighted average period of 2.15 years.

<u>Restricted Stock Award Plan:</u> The Bank adopted a non-qualified restricted stock award plan (the "Award Plan") for executive officers and non-employee directors under which the lesser of (i) 218,390 shares or (ii) the difference between 500,202 and the sum of the number of shares underlying stock options outstanding or granted after April 11, 2011 and the number of shares of Restricted Stock Awards granted that may be issued. Restricted Stock Awards vest at 25% per year on the anniversary date of the award over the first four years of the contract, except in the event of a qualifying Terminating Event.

There was no activity relating to the Bank's restricted stock award plan as of December 31, 2016.

As of December 31, 2016, there was no unrecognized compensation cost related to non-vested shares granted under the plan. All shares issued under this plan fully vested during the year 2015.

#### **NOTE 15. REGULATORY CAPITAL MATTERS**

<u>Regulatory Capital:</u> The Bank is subject to various regulatory capital adequacy requirements administered by the banking regulatory agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under

regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, would have a direct material effect on the Bank's financial statements. The final rules implementing Basel Committee on Banking Supervision's capital guidelines for U.S. banks (Basel III rules) became effective for the Bank on January 1, 2015 with full compliance with all of the requirements being phased in over a multi-year schedule, and fully phased in by January 1, 2019. Under the Basel III rules, the Bank must hold a capital conservation buffer above the adequately capitalized risk-based capital ratios. The capital conservation buffer for 2016 is 0.625%. The net unrealized gain or loss on available for sale securities is not included in computing regulatory capital. Management believes as of December 31, 2016, the Bank meets all capital adequacy requirements to which they are subject.

Prompt corrective action regulations define five capital tiers for depository institutions: well-capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion, and capital restoration plans are required. At year end 2016 and 2015, the most recent regulatory notifications categorized the Bank as well-capitalized under the regulatory framework for prompt corrective action. There are no conditions or events since that notification that management believes have changed the institution's category.

Actual and required capital amounts and ratios are presented below at yearend:

(Dollars in thousands)	Actual		Required for Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Regulations	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2016						
Total capital to risk weighted assets	\$ 56,613	12.89%	\$ 37,893	8.625%	\$ 43,934	10.00%
Tier 1 (Core) capital to risk weighted assets	\$ 51,087	11.63%	\$ 29,107	6.625%	\$ 35,148	8.00%
Common Tier 1 (CET1) to risk weighted assets	\$ 51,087	11.63%	\$ 22,516	5.125%	\$ 28,557	6.50%
Tier 1 (Core) capital to average assets	\$ 51,087	8.67%	\$ 23,557	4.000%	\$ 29,446	5.00%
(Dollars in thousands)	Ac	tual	Requ for Ca Adequacy	ıpital	To Be Capitalize Prompt Co Action Rec	d Under orrective
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2015						
Total capital to risk weighted assets	\$ 48,925	13.61%	\$ 28,752	8.00%	\$ 35,940	10.00%
Tier 1 (Core) capital to risk weighted assets	\$ 44,396	12.35%	\$ 21,564	6.00%	\$ 28,752	8.00%
Common Tier 1 (CET1) to risk weighted assets	\$ 44,396	12.35%	\$ 16,173	4.50%	\$ 23,361	6.50%

<u>Dividend Restrictions:</u> The Board of Directors may, to the extent of such earnings and the Bank's net capital requirements and subject to the provisions of the California Financial Code, declare and pay a portion of such earnings to its shareholders as dividends. No cash dividend will be declared without a complete analysis of capital impact, current economic assessment, and current risk analysis.

#### NOTE 16. LOAN COMMITMENTS AND OTHER DISCLOSURES

<u>Restrictions on Cash and Due from Banks:</u> The Bank is subject to Federal Reserve Act Regulation D, which requires banks to maintain average reserve balances with the Federal Reserve Bank. Reserve requirements are offset by usable cash reserves. The Bank had no reserve requirement at December 31, 2016 and December 31, 2015.

At times, the Bank maintains deposit amounts at corresponding banks that exceed federally insured limits. The Bank has not experienced any losses on amounts exceeding the insured limits.

<u>Loan Commitments:</u> The Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit, overdraft protection and financial guarantees. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the balance sheets. The contract amounts of those instruments reflect the extent of involvement the Bank has in particular classes of financial instruments.

The Bank's exposure to credit loss in the event of nonperformance by the other party for commitments to extend credit, standby letters of credit, and financial guarantees is represented by the contractual amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation. Collateral held varies but may include cash, securities, accounts receivable, inventory, property, plant and equipment, residential real estate and income-producing commercial properties.

Standby letters of credit and financial guarantees written are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. Financial instruments whose contract amounts represent credit risk at December 31, 2016 and December 31, 2015 are as follows:

	December 31,		
	2016	2015	
Commitments to extend credit Standby letters of credit	\$ 118,857,200	\$	95,893,559 1,033,366
	<u>\$ 119,630,139</u>	_\$_	96,926,925

#### **NOTE 17. EARNINGS PER SHARE**

<u>Earnings Per Share:</u> A reconciliation of the numerators and denominators of the basic and diluted earnings per share computation is as follows:

	Net Income	Weighted Average Number of Shares	Per Share Amount
<u>December 31, 2016</u>			
Basic earnings per share	\$ 6,491,464	2,178,322	\$ 2.98
Effect of dilutive stock based compensation	<u> </u>	30,750	
Diluted earnings per share	\$ 6,491,464	2,209,072	\$ 2.94
	Net Income	Weighted Average Number of Shares	Per Share Amount
<u>December 31, 2015</u>			
Basic earnings per share	\$ 5,433,780	2,148,648	\$ 2.53
Effect of dilutive stock based compensation	<del>-</del> _	30,274	
Diluted earnings per share	\$ 5,433,780	2,178,922	\$ 2.49

Stock options for 5,000 shares and 38,200 shares of common stock were not considered in computing diluted earnings per common share for the years ended December 31, 2016 and 2015, respectively, because they were anti-dilutive.
