## Fast Track! Remote Electronic Deposit Quick Guide

### Getting Started

---

#### Scanner Maintenance

Clean your scanner as advised by the manufacturer. If you run high volumes, we suggest cleaning daily.

#### Logon to Fast Track! Remote Electronic Deposit

Go to <https://sccountybank.com> and choose Business Online Banking Login under the Login tab.

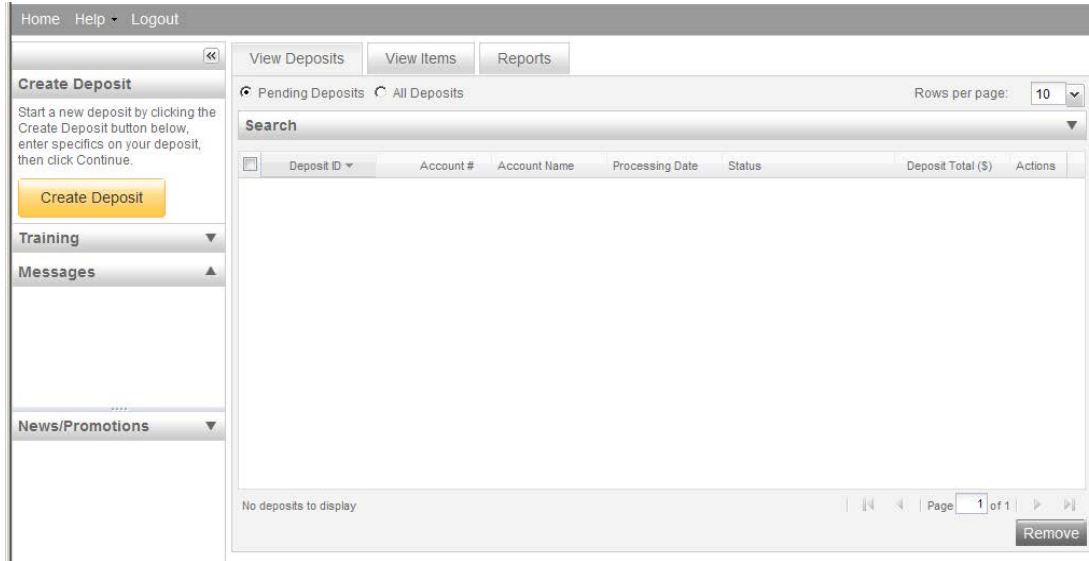

Once you are logged in, go to the Account Services tab and choose "Fast Track!".

## Creating a Deposit

---

### On Home Screen

Click Create Deposit

Deposit Name – Mandatory

Enter Deposit Amount

Select Account

AuxOnUs Field – Optional field for serial number on Virtual Credit.

Click Continue

The screenshot shows a 'Create Deposit' dialog box with the following fields:

- Deposit Name\*:
- Select WorkType\*: 26 - 26-MER- WC (dropdown menu)
- Deposit Amount\*:
- Select Account\*: Store #1 - \*\*\*\*\*6789 (dropdown menu)
- AuxOnUs Field:

At the bottom of the dialog box, there are 'Continue' and 'Cancel' buttons.

## Scanning Work

---

Please keep deposits to fewer than 400 items when possible.

1. Make sure the checks are all straightened and tidy before placing them in the hopper. Do not place too many items in hopper. This will reduce rejects, jams, double documents, and piggy backs. It will also maximize image quality.
2. Click **Scan** at the bottom of the screen.

Monitor the Items Scanned and Items Processed counters at the bottom of the screen. If Items Processed falls behind more than 50 items, click **Stop Scan** on the Scan Navigator. When Items Processed catch up, click **Scan**. If Items Processed stops increasing, you may have lost your internet connection.

*Note your Deposit ID number on something to attach to the front of your deposit after scanning. This is helpful if you need to refer back to this deposit.*

3. Verify that the last item on the screen matches the last item in the scanner pocket and that the item number sprayed by your scanner is legible if applicable. You are now ready to Fix Errors, balance, or create another deposit.

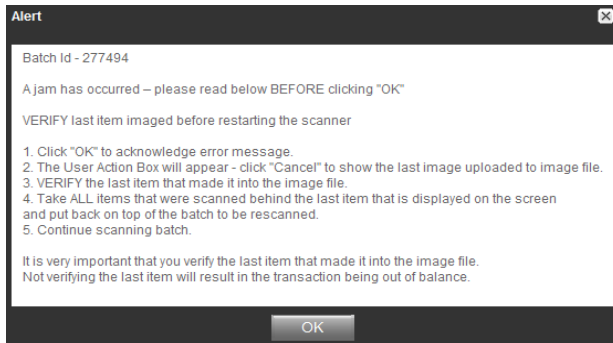

*Clip or band the deposit together with the deposit ID noted in front. Place processed deposit face down in a process complete bin or box. Storing the processed deposits in an orderly way will prevent accidental rescanning and make research easier. Processed deposits should be retained for at least 3 weeks in case there are issues with your deposit.*

### ***If an item Jams***

The scanner will stop and a message will appear.

- Remove the items from the exit pocket and turn face down.
- Remove the items from the feeder and place face up next to the scanner.

- Follow steps in the jam message below.

Clicking OK may clear any items jammed in the scanner. (If the scanner doesn't clear, you will need to manually remove the items.)

**Do not assume that an item was captured, because it is endorsed.**

Place uncaptured items in front of the items removed from the feeder. Return the items to the feeder and click: **Scan**.

## Fix Errors

If there are any errors the Fix Errors tab will be available. Click on **Fix Errors**.

If you click **Save Deposit** at any time before submitting, it will put the deposit in a Suspended status. The deposit will not be complete until you submit.

## MICR Errors

The cursor will move to each field requiring correction, which will be highlighted in pink. Key the missing or incomplete value according to what you see on the document. If you cannot read the document, click the image to enlarge it. Click the image again to re-size it.

**Hint:** You do not need to enter the decimal in the amount field

If you need to enter or correct data in a field that is not highlighted, use the following hotkeys to move to the desired field.

- F1 = Amount
- F2 = TC (*this field is for trancode or personal check number*)
- F3 = Account
- F4 = Field4 (*this is an alternate position for a 4-digit check number, positioned between Account & TR*)
- F5 = Transit Routing
- F6 = RIC (*just left of the TR if present; for return item & IRD use; blank the field when not present on document*)
- F7 = Serial (*this field is for the check number on business checks*)

### If An Item Piggybacks

If you discover that two checks have ran through the scanner together (“piggyback”), find the checks in the scanner exit pocket, delete the piggyback record, and scan these checks at the end of the deposit.

**IMPORTANT:**

The following items cannot be processed electronically. These items will create exceptions.

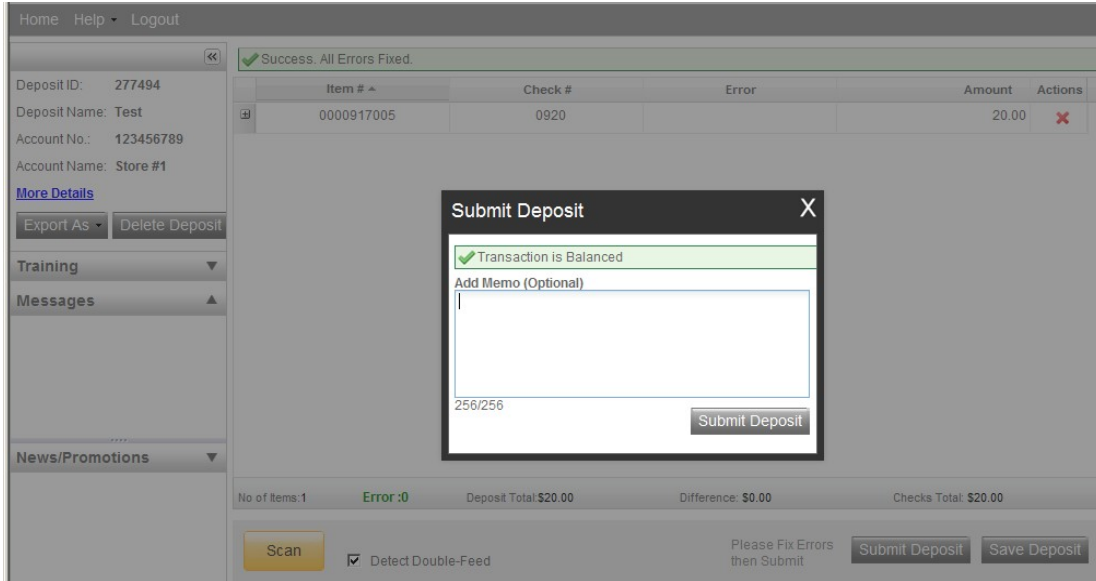

- Savings Bonds**
- Canadian US Dollar Items**
- Foreign Items**
- Non-Imageable Items (Checks that are not legible, too dark or too light)**

You will need to remove these from your deposit and take them to your Financial Institution.

## Balancing Deposits

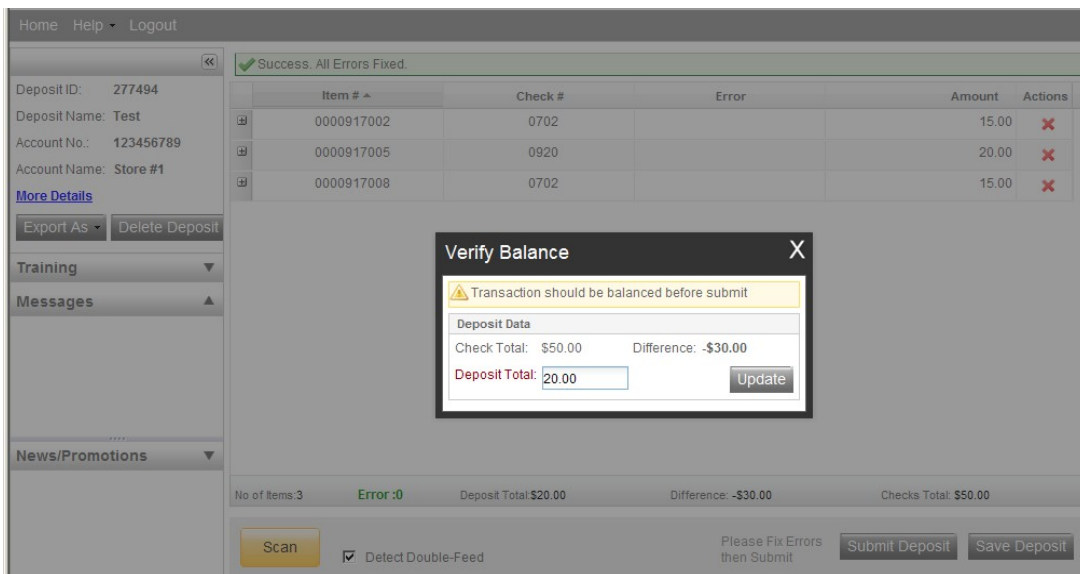

After all errors are fixed, click on **Submit Deposit**. There is an option to Add a Memo that can be reviewed in the deposit information.

- Click **Submit Deposit**

If the deposit is not in balance you must review the items. Open  each image to review that the amounts captured were correct. If necessary,

- scan missing items at the end of the deposit
- fix any amounts that are incorrect
- delete unintended items, if any

If all check records are correct and the deposit is still out of balance, then adjust the deposit amount to match the total of the checks.

**When the deposit has been submitted, you have options:**

- **Logout and close the browser window**
- **Create another deposit by clicking on Create Deposit**
- **Query / Deposit Report to review the deposit(s) you scanned today**

Remember to log-out between user sessions!

## End of Day

---

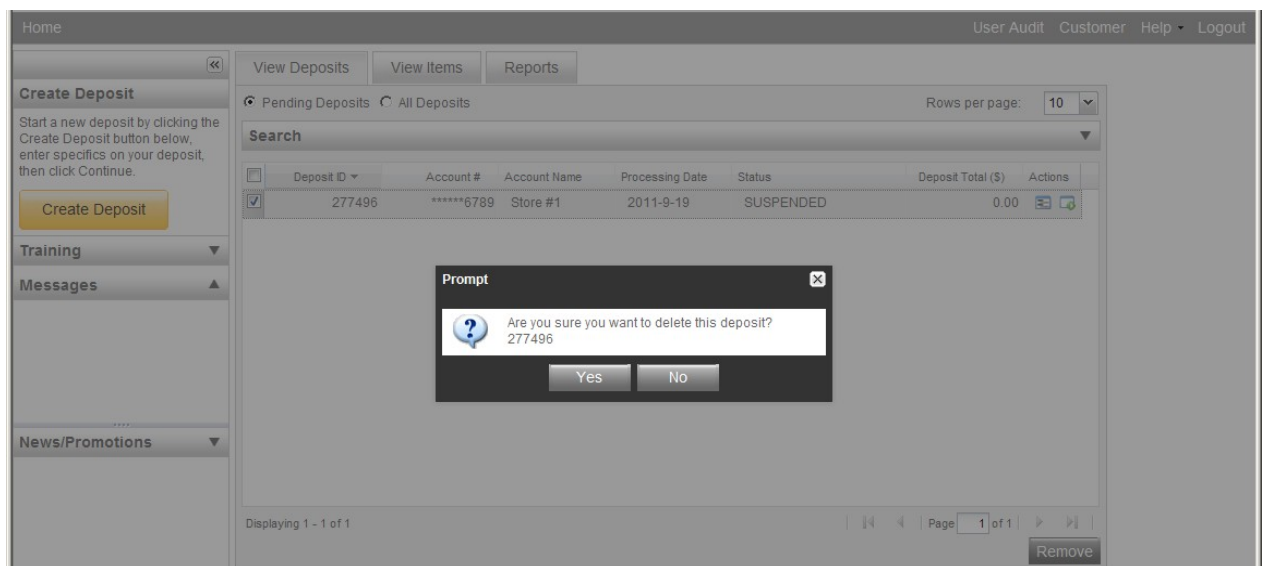

1. Verify that all Deposits are in *Submitted* or *Delivered* status. No Deposits should be listed on the **Pending Batches** tab on the Deposit Status screen.
2. Print or save any needed reports (e.g., Summary Report, Deposit Detail Report).
3. Click **Logout** at the top of any screen. This will log the user out of the application and then you can exit Internet Explorer.

### ***Additional How-Tos***
